

script2.js

```
1  async function hello() {  
2      console.log("hello");  
3  }  
4  
5  function getData(dataId, getNextData) {  
6      return new Promise((resolve, reject) => {  
7          setTimeout(() => {  
8              console.log("data", dataId);  
9              resolve("success");  
10             if (getNextData) {  
11                 getNextData();  
12             }  
13         }, 2000)  
14     });  
15 }  
16
```
