

script2.js

```
1 let btn1 = document.querySelector("#btn1");
2
3 // btn1.onclick = () => {
4 //     console.log("btn1 was clicked");
5 //     let a = 25;
6 //     a++;
7 //     console.log(a); //26
8 // };
9
10 btn1.onclick = (evt) => {
11     console.log(evt);
12     console.log(evt.type);
13     console.log(evt.target);
14     console.log(evt.clientX, evt.clientY);
15 };
16
17 let div = document.querySelector("div");
18 div.onmouseover = (evt) => {
19     // console.log("you are inside div");
20     console.log(evt);
21     console.log(evt.type);
22     console.log(evt.target);
23     console.log(evt.clientX, evt.clientY);
24 };
25
```
