script2.js

```javascript
1   let newHeading = document.createElement("h1");
2   newHeading.innerHTML = "<i>Hi, I am new!</i>";
3
4   document.querySelector("body").prepend(newHeading);
5
6   let para = document.querySelector("p");
7   para.remove();
8
9   // newHeading.remove();
10
```
