script2.js

```javascript
let newBtn = document.createElement("button");
newBtn.innerText = "click me!";
console.log(newBtn);

// let div = document.querySelector("div");
let p = document.querySelector("p");
// div.append(newBtn);
// div.prepend(newBtn);
// div.before(newBtn);
// div.after(newBtn);
p.after(newBtn);
```
